METACHORSEOSIS

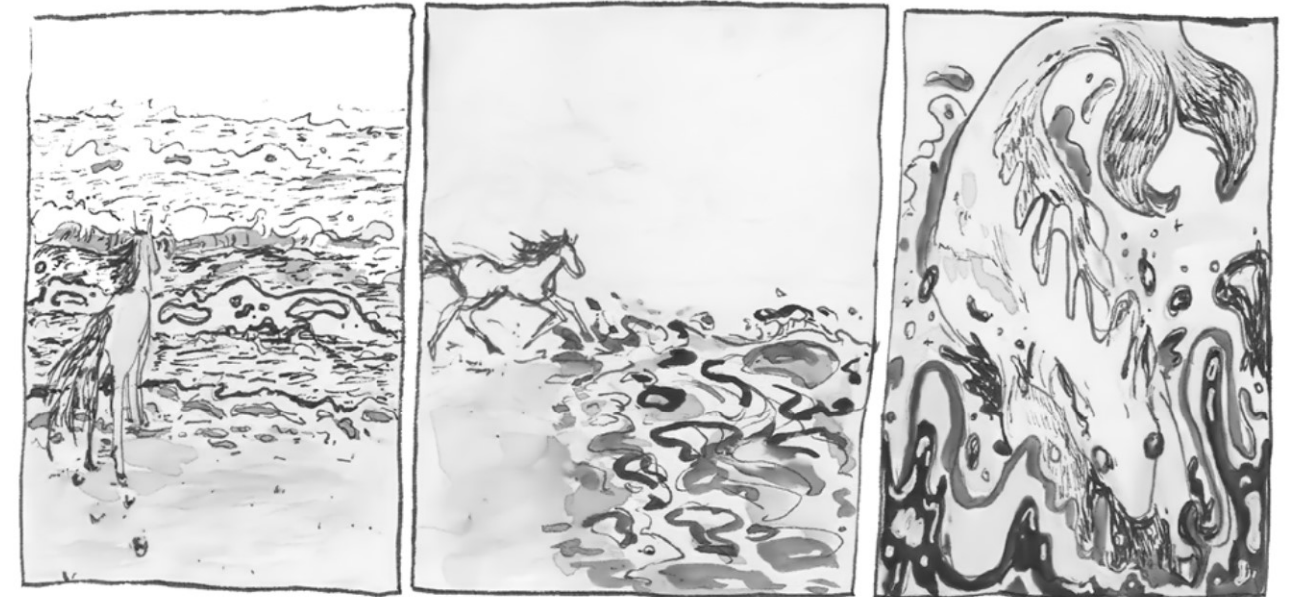

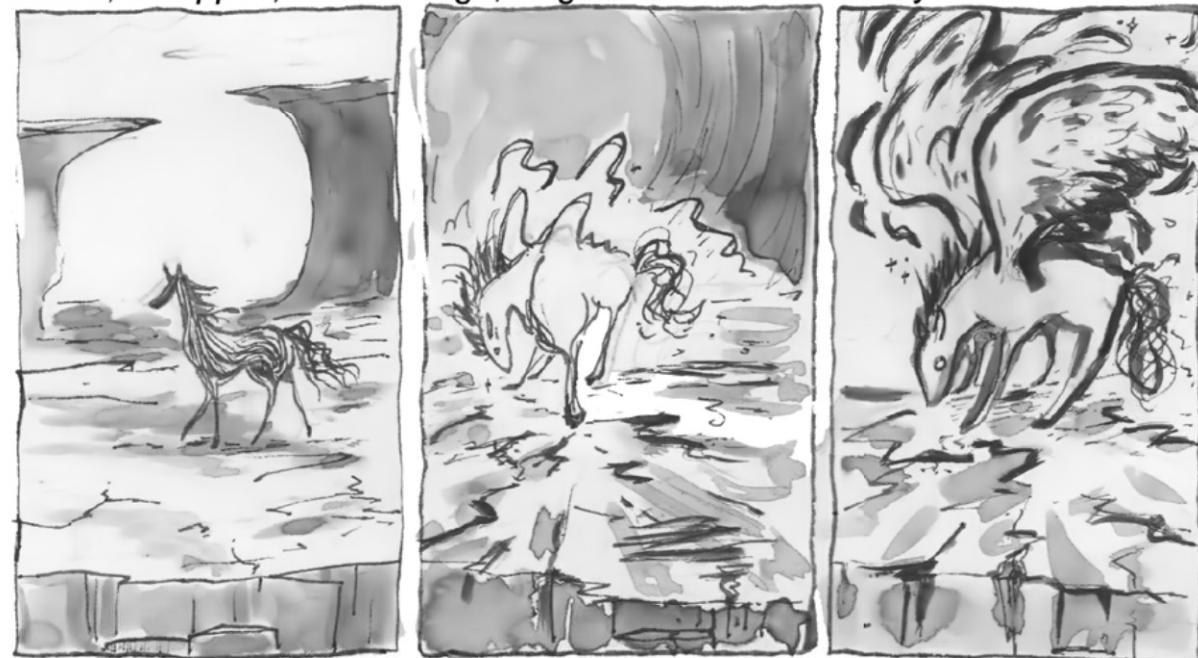

(all text from Wikipedia)

"The **horse** (*Equus ferus caballus*)[2][3] is a domesticated, one-toed, hoofed mammal. It belongs to the taxonomic family *Equidae* and is one of two extant subspecies of *Equus ferus*."

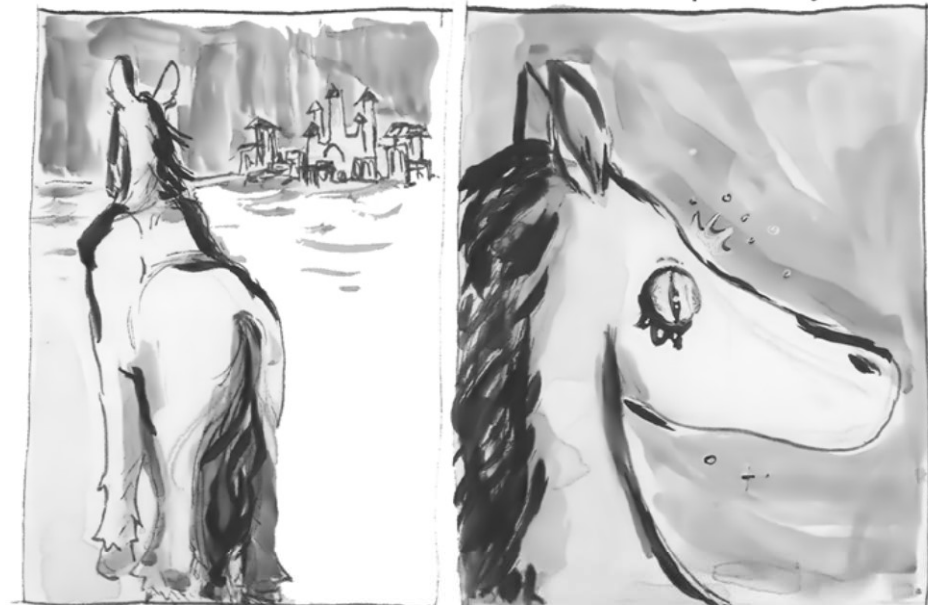

BY LOKI BISCHOFF

"The **horse** has evolved over the past 45 to 55 million years from a small multi-toed creature, *Eohippus*, into the large, single-toed animal of today."

"Humans began domesticating **horses** around 4000 BC, and their domestication is believed to have been widespread by 3000 BC."

"Horses in the subspecies *caballus* are domesticated, although some domesticated populations live in the wild as feral horses."

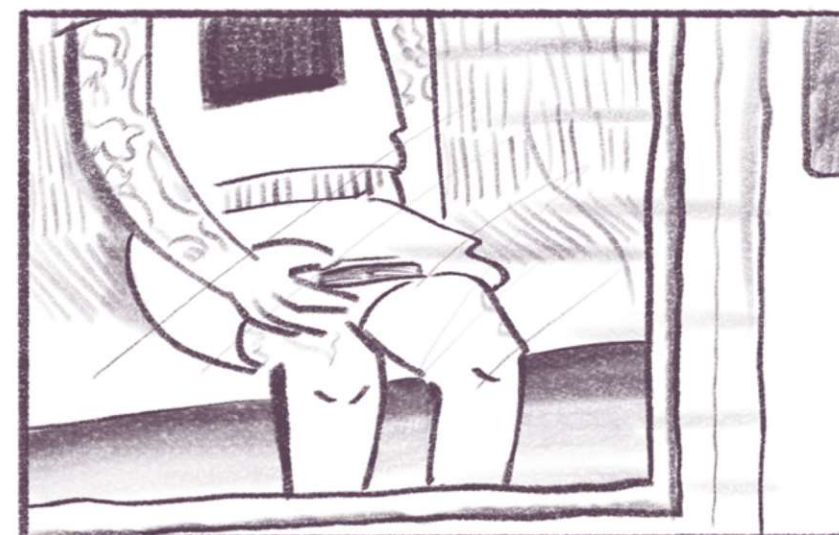

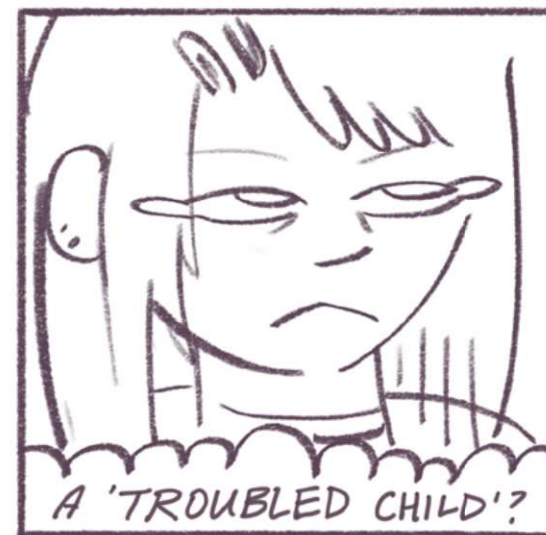

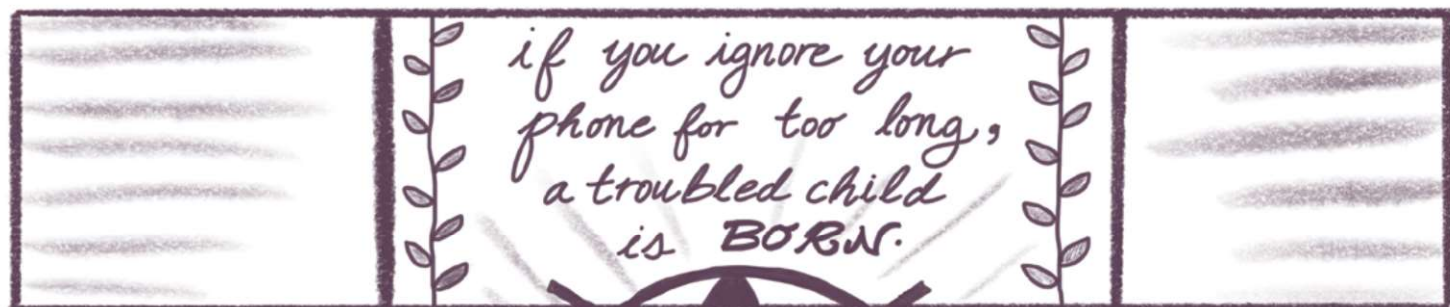

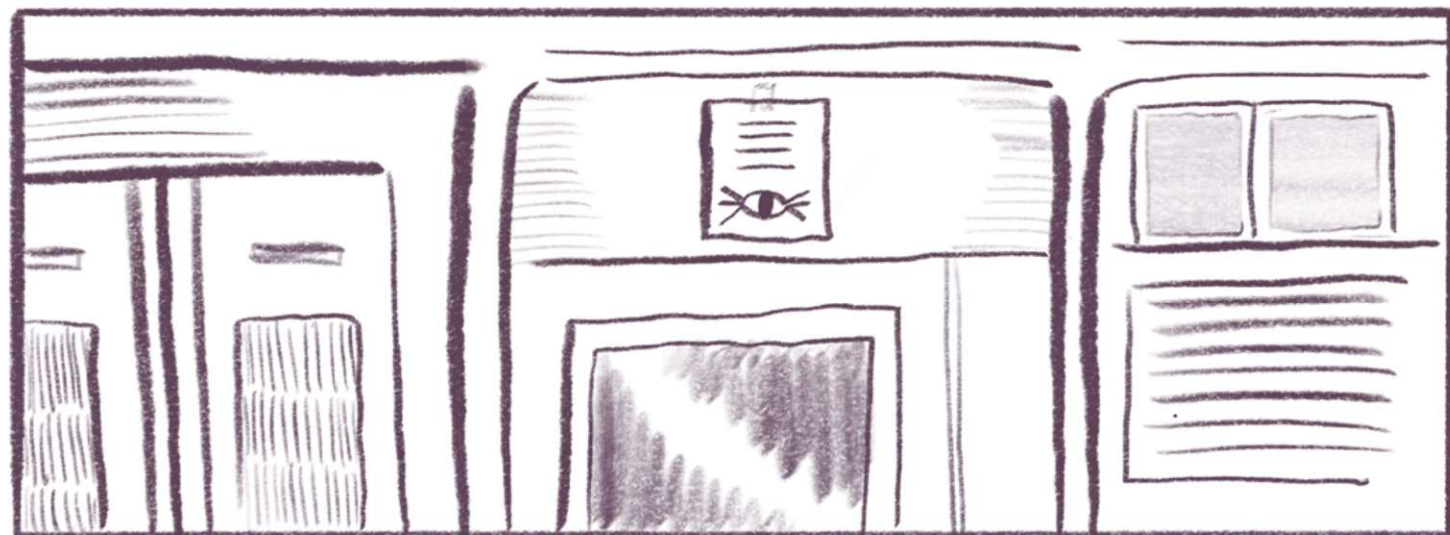

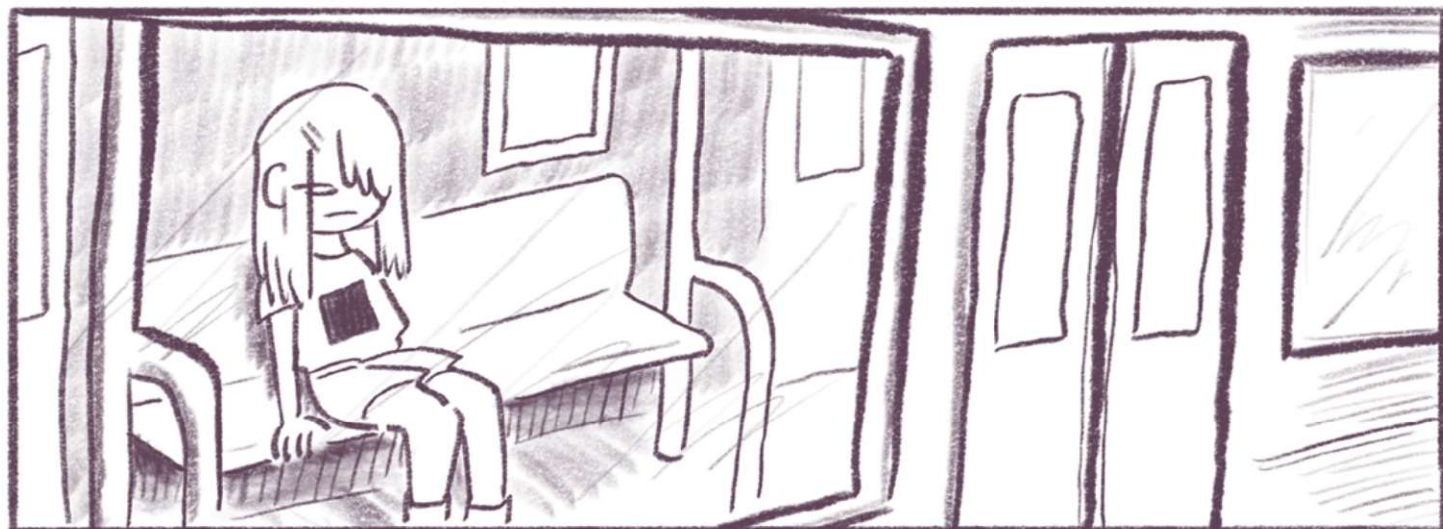

"These feral populations are not true wild horses, as this term is used to describe horses that have never been domesticated."

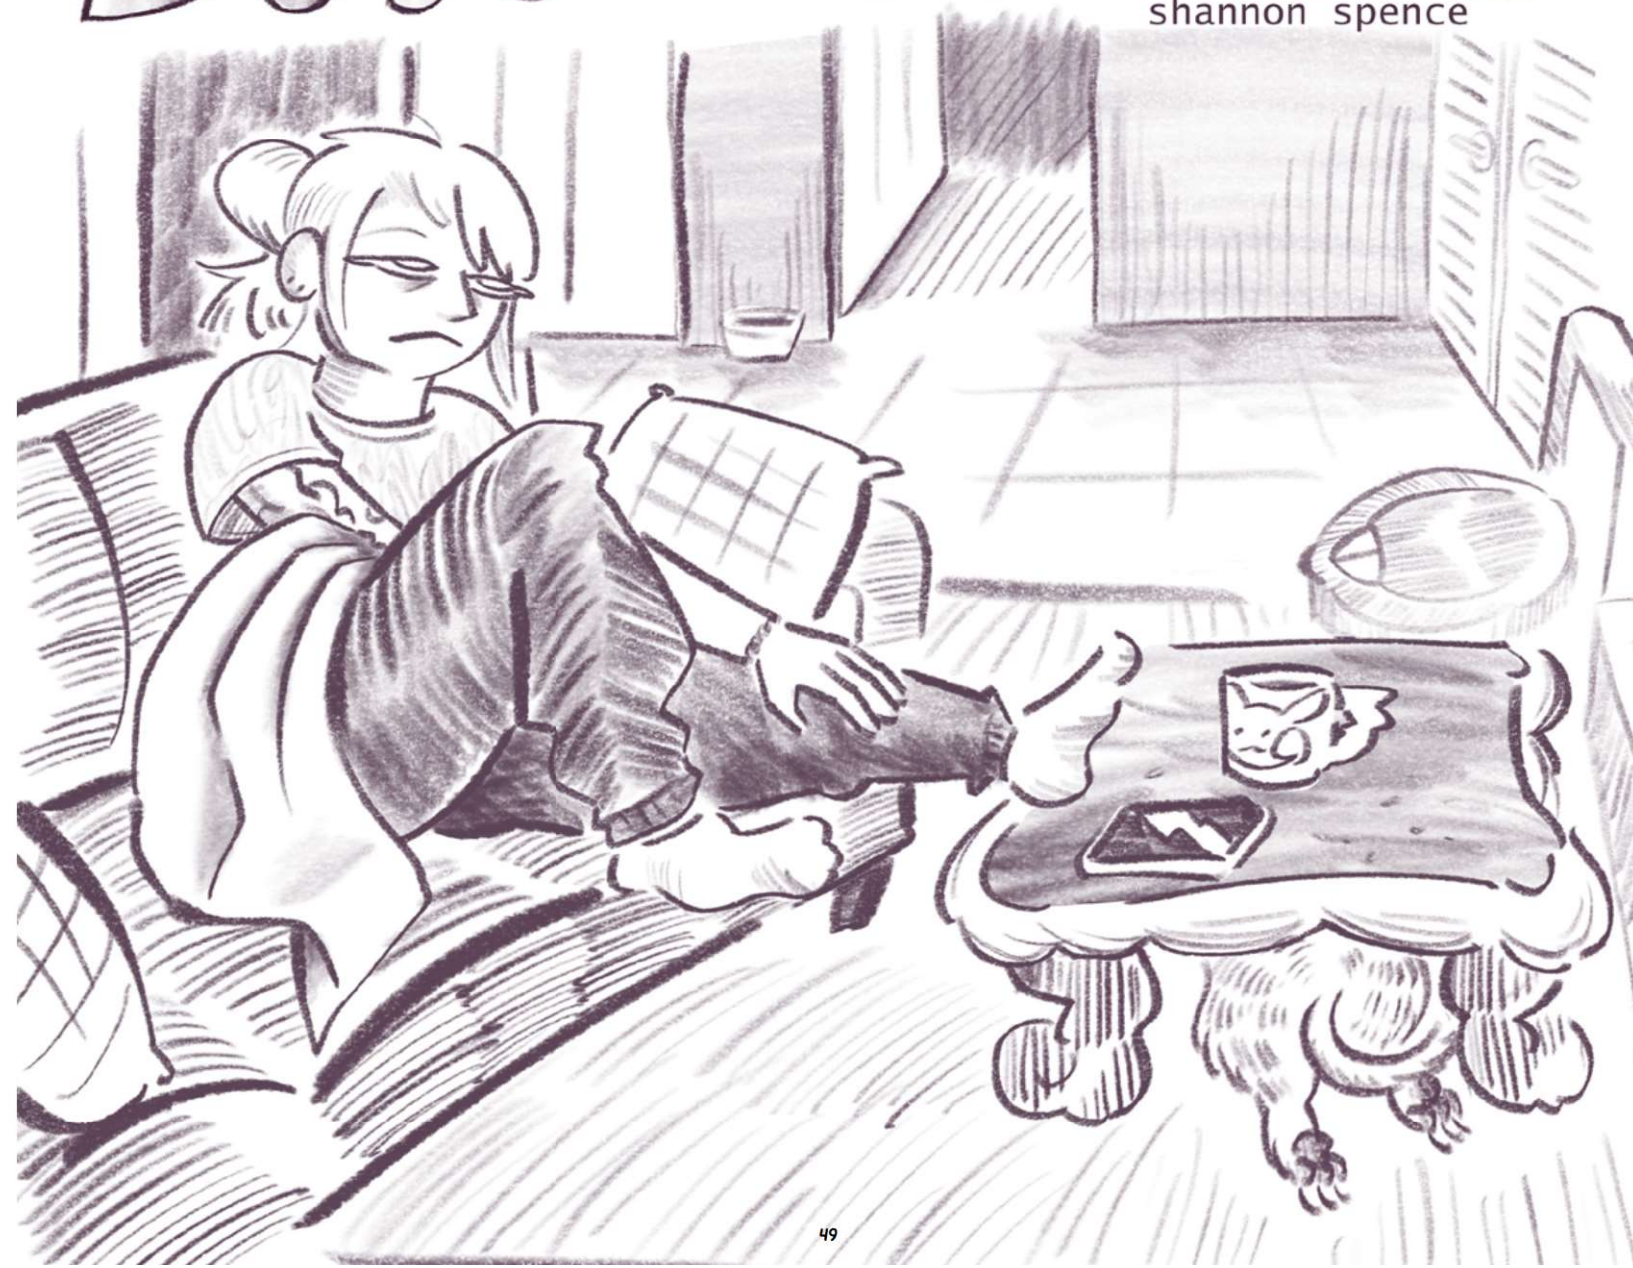

"For other uses, see [Horse](#) (disambiguation)."

DO NOT DISTURB

shannon spence

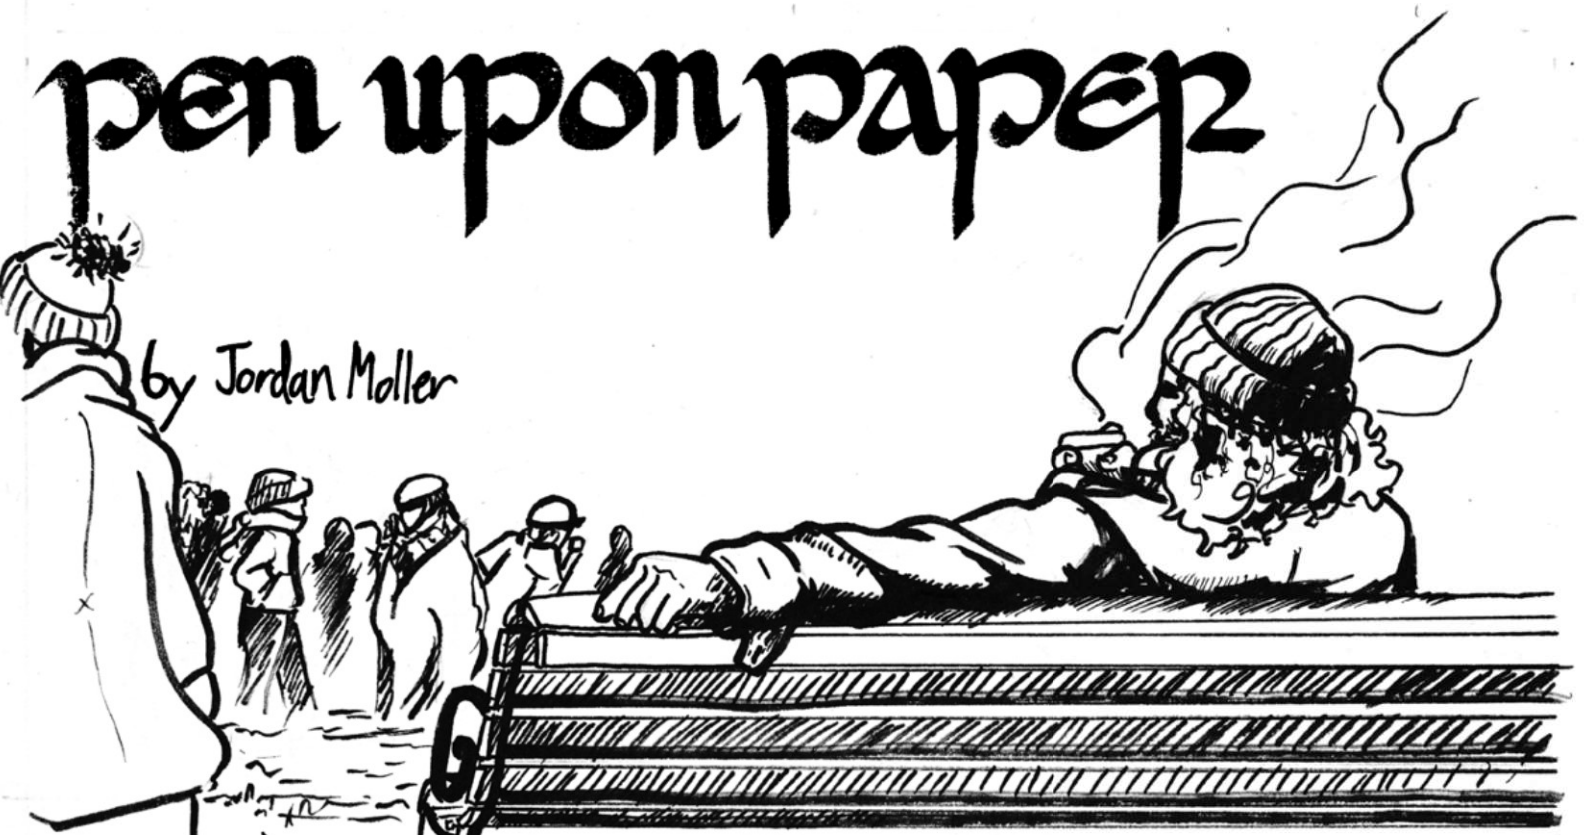

pen upon paper

by Jordan Moller

I started people watching when I was just a kid.

I would make up stories,

lives for each person I saw.

a knight

a werewolf

a witch

as I added to

the made up lives of

these innocent strangers

I learned that I could keep their stories...

...through magic.

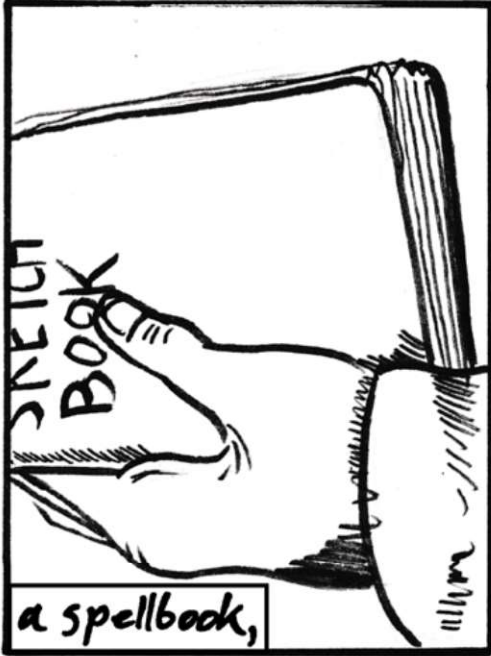

So long as I had

the proper tools...

award,

a spellbook,

and of course

some magic words

pen

upon

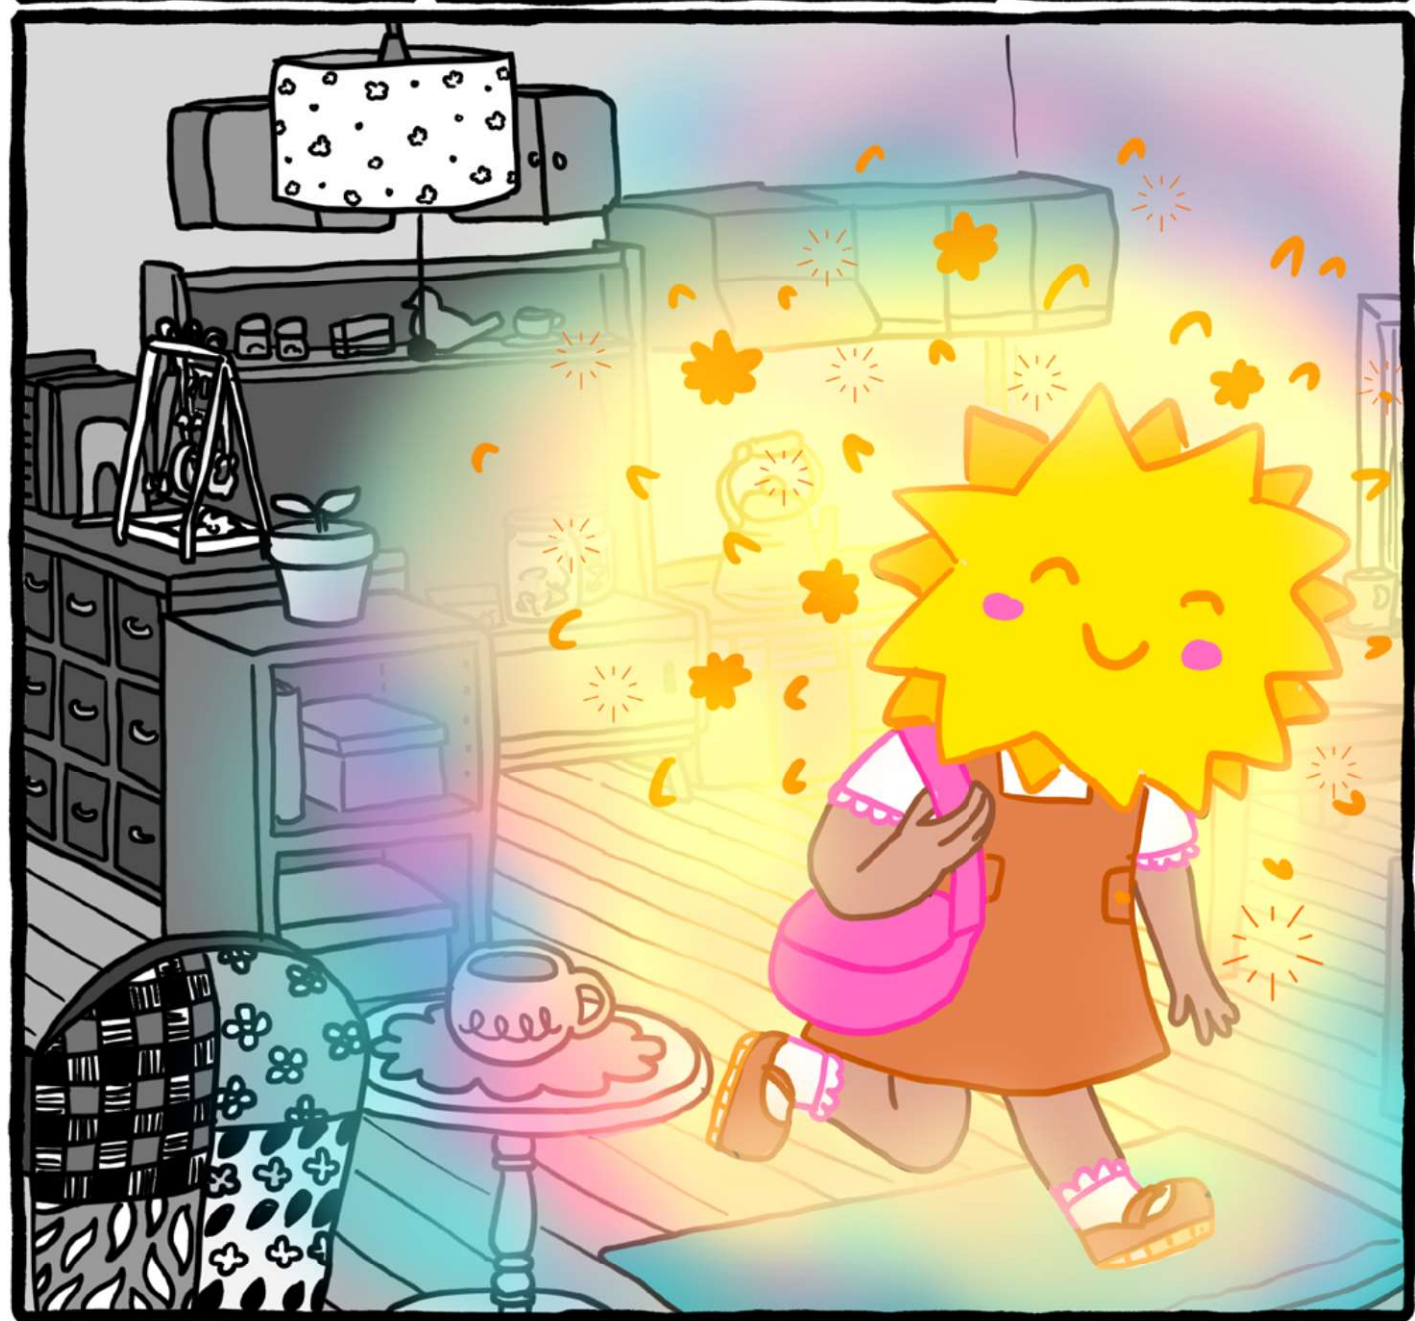

paper,

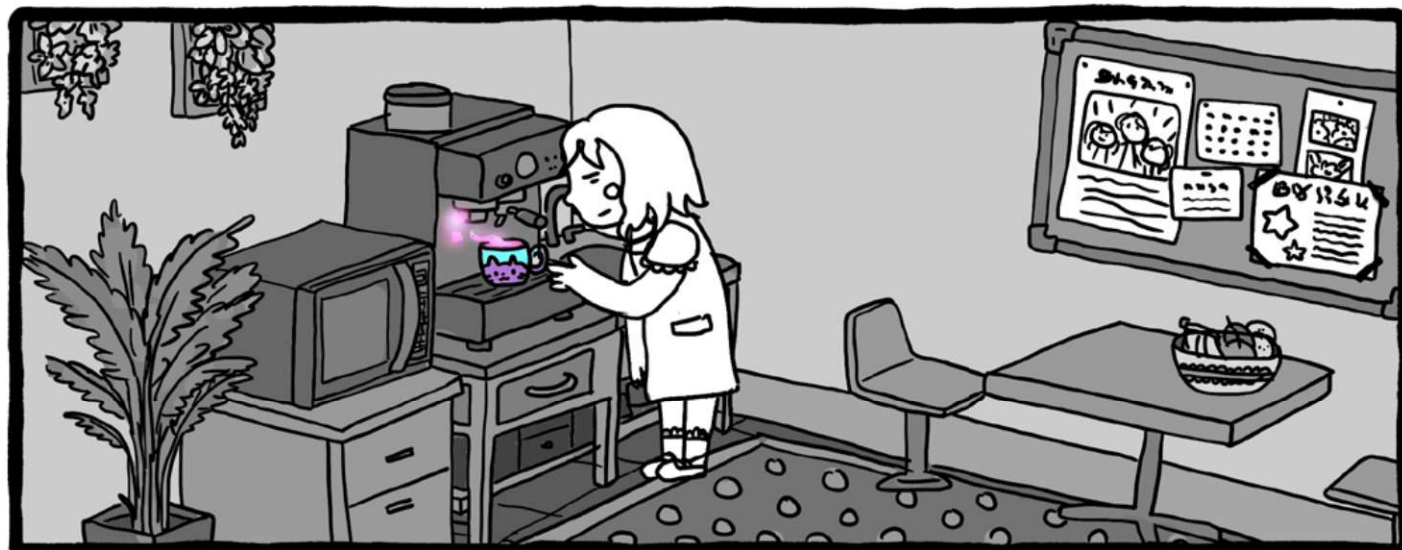

words

come

alive!
